SUBDIVISION OF SEC #2 TOWNSHIP NO 19 RANGE NO 15 EAST TOWN OF WINNEDONNE WINNEBAGO CO. WIS.

Copred Dec. 14 (1943 4:5.0

Began at N E corner of Sec 22 found stone set for corner by Co Surveyor B. Ts gone so I took the measurement from a soft Maple for future use standing in the corner of J Schneider field soft Paple 12 N 47°W 73 links dist I ran west from this corner in center of Road at V 2°45 at 19.64 to a line fence built bet the land owned by F Eckstein and August Eckstein, J Schneider & F Eckstein wished no to take this fonce as a correct line I said to them both that there was No evidence what ever of this fence being the the proper line and that I was not satisfied with this kind of work as it would not stand Law that the Proper way was to subdivide the whole Sec but the marsh being verry wet on the south side of Sec they saw that it would be impossible to do it at the present so they requested me to take this fence as a temporary line I found that fence was built on a Variation of h East I then measured East in center of Road 9.82 chs then I ran south on a parellel line with this line fence Y 40 I placed picket stakes along this line for the purpose of building a temporary line fence at 39.67 to a Bard wire fence running through the center of Sec 22 I set a stake on a line of this fence for a temporary stake I said to Schneider and Koketein at the time not to take this as a correct survey as I did not so consider it and would so record it I told them Both that when it froze up so that they could get on the marsh to have some good competent surveyor subdivide the whole Sec so as to place this line where it should be by the proper subdivision of the Sec and they Both agreed to do so and I left them with this understanding I finished at 12 0 clock noon
