Re: Drainage Plan for Fourth Addition to Fox Chase, City of Oshkosh

We have completed review of the drainage plan submitted by Baudhuin Inc. for the Fourth Addition to Fox Chase, a 13.9 acre residential development located in the N.E. 1/4 of the S.E. 1/4 and the S.E. 1/4 of the S.E. 1/4 of Section 29, T.18N.-R.16E., City of Oshkosh.

As submitted, the runoff analysis, the approach used in determining runoff computations and the means of providing on-site detention for this subdivision are complete and, by all indications, are accurate and meet the City of Oshkosh ordinance requirements. In addition, the plan includes detailed information regarding construction site erosion control measures to minimize silt and sediment deposition within the project area and in Sawyer Creek itself.

This is a well prepared and thorough plan. Our department finds no objections to it in the review process.

cc Baudhuin Incorporated
