SURVEYOR'S NOTE:

Because of the existing monumentation within the plat, all lots fit in a northerly-southerly direction, the platted dimensions very well, however, the northerly-southerly line which separates the lots, the approximate centerline of the bituminous pavement, cannot, with any certainty, be reconstructed. Therefore, the existing monumentalization of the mid-line of Lot 26 and the northerly line of Lot 30 were used as the true boundary lines.
